Bee Ware updates appliances and enhances service

Paris, 7th September 2011 – Following up on major developments over the past year, Bee Ware, the specialist in web application security, has announced an overhauled version of its physical appliances with five new configurations now replacing previous offerings;

In addition to the surface changes, Bee Ware has also announced new product features that simplify administration and contribute to improved productivity. Among the advancements the transparent proxy can be singled out for its capacity to make the solution easier to deploy and rapidly provide performance metrics.

The company has furthermore taken the plunge towards round-the-clock service. Customers can now benefit from 24/7 support (offered in both English and French) which is ensured by the newly reinforced R&D team. New terms in place also include five-year maintenance support.

Bee Ware has once again demonstrated strong market differentiation, and shows an unmistakable drive to align next generation technology with quality of service in its web application security offering.

Olivier AROUS, Bee Ware Marketing Director: «Innovation has always been our game. We are committed to helping current and future customers efficiently and continuously protect their business applications with our enterprise-class solutions. Our customers will get the best support possible and derive long-term benefits from our continuing initiatives. »
