Bee Ware's i-Suite now compatible with SuisseID

Newly released i-Suite 5.2.8 is compatible with the Swiss digital ID, set up to guarantee the security of electronic transactions.

Paris, 24th March 2011 - Bee Ware, the specialist in secure Web application delivery, has announced the compatibility of their solution i-Suite with the SuisseID platform.

SuisseID is a national initiative launched by Swiss officials to streamline e-commerce and e-government relations with citizens. Over 50 online services now use the standard and provide users with the option of logging into applications and conducting exchanges with a minimum of fuss and optimal security. Naturally, every State in the Swiss Confederation has to be able to access the platform.

For each Swiss state the main issue lies in securely interfacing applications with the SuisseID platform. Bee Ware's i-Suite incorporates advanced features that enable the integration of this criterion: the solution analyzes Web traffic and manages user authentication. Functioning as a gateway among different environments, i-Suite inspects XML and SAML exchanges and performs authentication checks.

Bee Ware is proud to have proved their capacity to participate in complex ID projects. This new development also demonstrates the firm's considerable insights into the business and technological issues facing organizations in Switzerland.

According to Marc Vaillant, Bee Ware CEO: « For our customers and partners, this new attribute is a valuable addition in our complete security offering. The compatibility of our solution with SuisseID further reinforces our status within the Swiss market and shows how motivated we are to assist local organizations with their security needs. »

About Bee Ware :

Bee Ware, the European provider of secure Web application delivery solutions, assures comprehensive business-smart protection for all organizations. With Bee Ware's integrated solution i-Suite companies have access to a web application firewall, access control, Web Single Sign On, an XML firewall, traffic monitoring and centralized management, making significant cost reduction and high-performance a reality. i-Suite scales to meet the requirements of appliance-based Software as a Service or virtual machine deployment and adapts to all IT infrastructures.

Bee Ware was founded in 2002 and its European presence is primarily shared among industry, healthcare, finance and public services.
